Professional Summary

Data engineer with 5 years of experience designing and operating cloud-native data platforms and production ML integrations. Skilled in Python, SQL, and Databricks with CI/CD workflows that delivered low-latency pipelines reconciling \$1M+ in claims and reduced manual processing by 40%. Collaborative partner adept at building scalable integrations and operationalizing AI models for enterprise environments.

PROFESSIONAL EXPERIENCE

Intellirev | *AI Data Engineer*

May 2024 - Jul 2026

- Built and managed real-time ETL pipelines in Python (Pandas, Scikit-learn) and ensured 99.9% data uptime and accurate processing of \$1M+ in annual claims and payments, supporting production AI agent deployment.
- Integrated machine learning models and deployed LLM-based agents into ETL workflows, reducing manual reconciliation time by 40% and detecting 95% of billing anomalies before submission, improving automation accuracy and compliance.
- Architected a HIPAA-compliant cloud environment on AWS (EC2, S3, Lambda) handling 500+ monthly data transactions, optimizing throughput by 30% while ensuring regulatory-grade data security.
- Collaborated with data scientists, Power BI developers, and SAP stakeholders to operationalize ML-driven claim analysis via Kafka pipelines, boosting collected revenue by 15% and surfacing actionable insights for supply chain and risk mitigation strategies.
- Deployed containerized microservices on Azure Kubernetes Service using Docker and integrated AI agent platforms to support scalable data pipeline orchestration and reduce deployment time by 40%.
- Created Tableau dashboards integrated with Delta Lake data lakes, enhancing executive-level visibility into marketing and procurement performance.
- Integrated AI agents with customer CRMs and telephony platforms, enhancing automated support capabilities for contact center operations.

BNY Mellon | *Data Engineer*

Jul 2023 - Mar 2024

- Engineered and automated data integration pipelines across Snowflake, MySQL, and SAP, increasing financial reporting efficiency by 30% and streamlining compliance workflows.
- Delivered Tableau and Power BI dashboards leveraging Databricks real-time data streams with Delta Live Tables, cutting latency of market risk insights by 35% and enabling faster executive response.
- Implemented data governance and lineage tracking with AWS IAM, audit logs, and Power Automate notifications, ensuring secure, traceable, and compliant data flows.
- Built lakehouse tables with Apache Hudi to support incremental data processing and ACID transactions, improving data freshness and reliability.
- Partnered with cross-functional teams to standardize data models, Power Automate flows, and SQL templates, improving reporting accuracy to 99% and reducing repetitive manual processes by 35%.

Awaywagoo | *Data Analyst*

Jul 2019 - Jul 2021

- Developed a PostgreSQL analytics platform supporting 10K+ monthly queries, accelerating GTM and supply chain decision-making processes.
- Built modular ETL pipelines using Alteryx and MySQL, reducing batch processing latency by 40% and increasing data reliability for reporting.
- Created reusable dashboard templates for investment teams, reducing repetitive requests and promoting analytics self-service adoption across teams.
- Built and deployed ETL pipelines and SQL transformations in MySQL server, improving throughput by 40% and reducing reporting delays by 2+ days across business intelligence workflows.

Skills

Data Engineering & Frameworks: GraphQL, Pandas, Airflow, Databricks, Apache Spark, Delta Lake, Spark Structured Streaming, Delta Live Tables, Kafka, Kinesis

Programming Languages: R, Python, SQL, PL/SQL

Databases & Storage: MySQL, Postgres, Oracle, NoSQL

Cloud & DevOps: AWS, Azure, Docker, Linux/Unix, Git, Databricks

Analytics & Business Intelligence: Google Analytics, Tableau, Business Analytics

Data Science & Machine Learning: Data Science, Machine Learning, Large Language Model (LLM) Deployment, AI Agent Platforms, Production AI Agent Deployment

Methodologies & Management: Business Strategy, Management, Market Research, Financial analysis, Operations Research, Product Design, SCRUM, Agile

Certifications

- Databricks Certified Generative AI Engineer Associate: Validated in designing and deploying LLM-enabled solutions, including RAG applications and LLM chains, using Databricks tooling. Demonstrated proficiency in Vector Search, Model Serving, MLflow, and Unity Catalog for end-to-end generative AI solution development and governance.

EDUCATION

Stevens Institute of Technology | *Master's, Information Systems*

New Jersey Aug 2021 - May 2023

Mumbai University | *Bachelor's, Computer Engineering*

Maharashtra Jul 2016 - Jun 2019
